

Safety & Environment Moment (S&E Moment)

Script 12 – Accident

Welcome to S&E Moment.

Today, we would be looking at the term Accident.

An accident is an unwanted or unplanned event that results in physical harm to people, damage to property, loss or damages to the environment. A man in a hurry to rush off to work from his home crushed his toddler baby boy in the process of reversing in a haste to work. Little did he know that his toddler baby was playing right behind the right side back tyre of his car. If he had taken his time to conduct a 360 check around his car before moving, the life of his child would have been spared. He never planned crushing his own son. It was an accident.

Remember, accidents don't just happen, they are caused. Observe safety rules and regulations, avoid taking shortcuts, do the right thing. Take safety precautions seriously and obey them dutifully.

COVID 19 is an unwanted event, don't allow yourself to be its next accident victim, take care, and take control.

Join me on the next segment as we take a look at the term "Near Miss".

Please visit the Ghana Health Service COVID-19 website for further information and updates on ways to prevent the spread of the disease.
